K-SURE BELT SUPPORT SYSTEM

Replacement Belt Support System For Trough Idlers

Effective skirting performance can only be achieved by proper belt support. Material spillage due to belt sag can easily be controlled by fitting this system, which utilizes the existing idler frames.

Belt edge sag, which is a likely cause of spillage, is quickly eliminated when the wing rollers are replaced with the K-SURE BELT SUPPORT BRACKETS and K-SURE BELT SUPPORT SLIDER RAILS. The system requires no pre-engineering and fitting the rails is elementary.

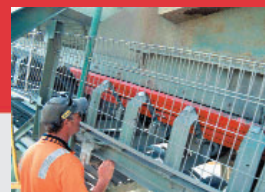

- Controls spillage.
- Reduces dust leakage.
- Fits into existing idler frames.
- Easy to install.
